3 @details x
4 @auth Justin Reina
5 @date 10/31/20
6
7 @section Procedure
8
9 //Moses
10 Thanks dude we should start a computer flipping business😏
11
12 //Justin
13 Ok
14 Wait
15 If you try to sell someone Espoir's and they catch on
16 They may get pissed! 😡
17
18 //Moses
19 Everything would be in their eyes tho
20
21 //Justin
22 Ok yes
23 Can convince your grandmother to buy it, because she loves you
24 Don't use my name tho! 😏
25
26 //Moses
27 She doesn't need one but it would be simple I'll find a laptop send u the info u
tell me if it's good or bad if it's good u do the fun stuff to it maybe get a bag
for it then sell it for more Nd then we both get paid😏
28
29 //Justin
30 This sounds interesting, would be fun and a great chance for you to learn
31 But this realm of business is filled with crooks! Treacherous waters, stay out
32
33 //Moses
34 Every realm of business is a he same
35
36 //Justin
37 Yes
38 This is a hotspot today though
39 With very little returns too, which is a bit ironic
40
41 //Moses
42 Explain
43
44 //Justin
45 A lot of average class, middle-aged men see this as easy returns
46 A pretty common topic of pursuit for early 20'a
47 And a low-investment high returns market for the established com-artist
48 With each finding leisure, and indulgence in said activities
49 😏
50
51 //Moses
52 So ur saying it's a scam
53
54 //Justin
55 For the con-artists yes!!
56 For the others, a mixed bag
57
58 //Moses
59 What's a mixed bag
60
61 //Justin
62 That's an analogy for a set of things that are very different, the highs and the lows
63 The good and the bad, all converging together in the same set, or "bag"
64
65 //Moses
66 So not a good investment
67

68 //Justin
69 No
70 I have my thoughts wrt to investment for you now, let me know
71
72 //Moses
73 Ok what is it
74
75 //Justin
76 Cool
77 Let's start with the foundation, framework and targets
78 I will ask some questions, and take some notes
79 For your foundation, what are you good at?
80
81 //Moses
82 On investment?
83
84 //Justin
85 Stop using that word for the moment, it bears bias and predisposition
86 In life - the sciences, arts; business; philosophy? Outreach? Studies? Church...
what is Moses good with today?
87 For me it is the sciences, outreach and embedded software, to note
88
89 //Moses
90 I can easily socialize with people I learn almost anything fast and like to add
creativity or swag to everything
91
92 //Justin
93 Dude
94 Cool! This is what I was thinking
95 For your immediate network, and family, what resources or people have similar
interest or skill?
96
97 //Moses
98 Idk
99
100 //Justin
101 Indulge me
102 Are there any business folk you are related to?
103 Smart cookies?
104 Cunning Biz minds?
105 Oh -
106 Art!!
107 do you know anyone else like him?
108 We can put Mami in the 'Academic' corner
109
110 //Moses
111 Ok espoir has a degree In Mechatronics Peter studying electrician my friends uncle
works in Microsoft and this guy called Justin Ik is a computer addict
112
113 //Justin
114 And Esther in the 'Ambition for Excellence' corner
115
116 //Moses
117 Yes she's gonna be a pilot
118
119 //Justin
120 Justin for engineering
121 Any others, like these? Thoughts?
122
123 //Moses
124 Ok espoir has a degree In Mechatronics Peter studying electrician my friends uncle
works in Microsoft and this guy called Justin Ik is a computer addict
125 Everybody I can think for now is in here I think
126
127 //Justin
128 Cool, Team:
129 • Art, Mami, Esther, Espoir, Peter, Jik & Jmr
130
131 //Moses

132 Yes
133
134 //Justin
135 Last for foundation, do you have any affiliations or interested in current fields
of work?
136 Cinematography or video editing, for example
137 Don't be shy, let me know your thoughts
138
139 //Moses
140 Idk yet but put it down as that
141
142 //Justin
143 Those were my thoughts, just checking
144 I am feeling a flow to this; I think you'll like where this goes
145 For framework, what tools or resource do you have to prepare this intellect you
describe? To focus the ambition, to channel that desire?
146 Rich tools with a wide-open canvas right now, important to put them at good use!
147 ☹
148 e.g. software, routine, methods, teachers, etc.
149 The Yoga can be a principal tool now, to note
150
151 //Moses
152 Ok the yoga nice
153
154 //Justin
155 Software - Trello, Dropbox, Skype & MATLAB
156 Any mentors? Academic counselors?
157 Guides?
158
159 //Moses
160 Nope
161
162 //Justin
163 We can work on that, this is principal
164 Few more questions
165 What directions do you have to step forward onto, towards what's next?
166 Like community college, internships, outreach; thoughts?
167
168 //Moses
169 That's part idk yet
170
171 //Justin
172 Cool
173 And now a wide question, searching for passions or direct targets, for the desire
and reason
174 Who do you want to be?
175
176 //Moses
177 I have too many passions
178 I wanna be a lot of things
179
180 //Justin
181 But
182 You are a finite resource the thinner you spread, the less you achieve
183 Which you only find out, on results, as I've seen
184 ☹
185
186 //Moses
187 That's true so I have to narrow it down the rest can be hobbies
188
189 //Justin
190 Let's take this as a moment of practice, in preparation & form
191 That's retire the word 'hobby', from your vocabulary for the moment - these are now
"personal interests"
192 thoughts?
193 *Lets retire
194
195 //Moses
196 Ok done

197
198 //Justin
199 For your personal interest, let's explore a little bit
200 Just in general interest
201 What are the most exciting?
202
203 //Moses
204 YouTube sports and building rc cars
205
206 //Justin
207 What are the highest investment for you? Money, time, efforts, etc.
208
209 //Moses
210 For now it's gonna be YouTube and engineering I might become the next tony stark
211
212 //Justin
213 Explain on the Tony stark
214 I'm curious
215
216 //Moses
217 I'm interested in the type of engineering where u build things
218
219 //Justin
220 To create
221 Yes!
222 Why?
223
224 //Moses
225 It's fun smart and rewarding
226
227 //Justin
228 Rewarding; yes
229 For me, 'to contribute'
230 To what?
231
232 //Moses
233 What do u mean
234
235 //Justin
236 For me, to contribute
237 One sec let me pull that up
238 From a recent professional letter -
239 "I am led with a passion, a desire & intrigue for the needs around me that holds well for this role; a connection and attention that has delivered consistent results. To what, though? Well personally in ministries & food outreach; academically in engineering leadership & ideation; and professionally, in new high-volume product creation & delivery to market. "To contribute", in my words, an established asset today ready for your use"
240 To contribute
241 How would you describe thy why for the 'smarts', for you?
242
243 //Moses
244 Yea I like helping people providing a better life for me and those around me
245
246 //Justin
247 I love this
248 Articulate and clean, well spoken
249 Ok, last question and then I will share my thoughts
250 For the target of your next steps, professionally and personally, their may be different viewpoints. Let's consider this question from the following viewpoints -
251 A. Your academic counselor
252 B. Your pastor
253 C. Your parents
254 D. Me (at least as you'd estimate)
255 And the most important -
256 E. You!
257 Take your time, share responses individually for each view A-E (no hurries, prep and thought very valuable here)
258 The diversity to lenses A-E promotes a rich culmination on response, to note

259
260 //Moses
261 What's the question tho
262
263 //Justin
264 Q: What are the targets of Moses' next steps right now? Where does this go?
265
266 //Moses
267 I don't really give much thoughts bout other ppl view points to my future idk it's
kind of a complicated
268 Question
269
270 //Justin
271 yep!
272 this is specific method to unravel that, a step
273 the Lord doesn't "give" sin or evil, he "leaves" it be free - it is from this gift,
or diversity to being that the true "nature" to the gift of life begins
274 same thing here, with all lenses combined
275 you get a glimpse, a perspective ahead
276 imo
277 so give me your best efforts,
278 A.
279 B.
280 C.
281 D.
282 E.
283 have at it! Take your time, this is an established effort I can help let me know \
284
285 //Moses
286 A. I don't have an academic counselor
287 B. I don't talk to my pastor but he would want me to do more services in the church
probably
288 C. My parents see me goin to a good college studying for x years hoping to make x
mount of money when I'm done
289 D. I'd estimate u want me to be careful choosing what I wanna do
290 E. I see myself doin something I like but also a good income source and I see
myself developing consistency and discipline
291
292 //Justin
293 Nice
294 Thank you for the elaboration and detail! In touch in a bit
295
296 //Moses
297 Ok
298
299 //Justin
300 Have you ever heard of GitHub?
301
302 //Moses
303 No
304
305 //Justin
306 Interesting
307 what are your general interests in software or engineering?
308
309 //Moses
310 I'm into like AI stuff
311
312 //Justin
313 Careful -
314 • Dave:

319
320 //Justin

321 Intel Software Innovator David Ojika: Bringing AI to More People
322 software.intel.com
323 let me know - lol ☺
324 I'm doin something rn I'll look at this later
325 don't speak in certainties ("I'm doing"), speak in direction
326 *permission to swear in exclamation, periodically?
327 Go heat
328 Ahead
329 thx
330 ok so you have no fucking idea "what" you will be doing
331 "who" you will fall in love with
332 "where" you'll be going, etc. That's none of our business either, imo; what is our
business is direction, focus & alignment on the path ahead
333 so -
334 for "AI" for you now, what benefits does this have for your academic path? work
path? what benefits can it bring to the work around you?
335 as you see it now, at least, thoughts?
336 lol - oops! I misread I thought you were saying "AI is something that I will use
later"... you just said u were busy
337 oops! Nevertheless these are interesting questions, share a resp l8r
338
339
